Experience

Front End Developer, Tastemade — July 2016 - Present

Working directly with the content team and designers, I helped create the current experience on www.tastemade.com. I implemented several user-centric optimizations including saving recipes and subscribing to the company's premium offering. I currently serve as the chief developer for the Tastemade Store, where I've created the shop template and helped implement user experience. I've also been responsible for maintaining our Apple TV 3 and Roku platforms as well as our RSS feed for media partners.

Front End Developer, GPO — September 2015 - June 2016

Responsible for front end implementation of responsive, large scale, local search pages for large companies such as Domino's, Bridgestone, Maggianos and Cort Furniture. Heavy focus on SEO.

Web Developer, Mutual Mobile — July 2012 - September 2015

Worked on a wide variety of web apps and responsive sites with clients like Zynga, Greenway, AGCO and MySask. Optimized and maintained company website, created email templates and new internal and external facing tools for the marketing department.
